Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of the request for continued examination filed 04/30/2009.

The rejections under 35 USC 112, first and second paragraphs is withdrawn as agreed during the interview of April 10, 2009.

The following is a new rejection of the claims in response to applicant's amendment of claim 14:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14-43, 64 and 65 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has amended the claimed to read on a composition which is in "a hardened state". While [0055] does provide support for hardening of the composition through cooling, this is at best a subjective description for a composition which is stable enough to be removed from a mold, and not a description of a rigid implant of quantifiable hardness. The wording of the claims is therefore considered new matter.

The rejection under the judicially created doctrine of obviousness-type double patenting as well as 35 USC 103(a) are maintained in this action. Applicant is further advised that obviousness-type double patenting rejections are no longer held in abeyance. The next action should contain either an argument on the merits of the rejection or a terminal disclaimer in order to be considered fully responsive.

Response to Arguments

Applicant's arguments filed 04/30/2009 have been fully considered but they are not persuasive.

Regarding the rejections under 35 USC 103(a), applicant argues that newly amended claim 14 which now recites "in a hardened state", overcomes the rejections which are all based on Lin et al. While applicant correctly points to col. 4, line 68, this description is of the newly synthesized polymer. The Abstract refers to the final product (the implant) as "semi-rigid". As such, the amended claims do not overcome the rejections since "a hardened state" is not quantifiable and would include a semi-rigid structure. As such, the rejections under 35 USC 103(a) are maintained in this action.

The reference to Lin suggests that the softer nature of their product results from the use of very low molecular weight materials. Applicant should look for support from the original specification for molecular weights taught away from in Lin et al.
